PREFAZIONE

In questo mio ultimo libro ho raccolto disegni di tassellazioni e poliedri di vario tipo.
La differenza fra le due categorie sta nel tipo di carta da adoperare.
Per le tassellazioni si adopera carta leggera mono o bicolore, mentre per i poliedri va meglio carta monocolora pesante tipo stardream da 120 gr.
Consiglio di stirare le tassellazioni ultimate con ferro da stiro e panno umido.

In this latest book of mine I have collected drawings of tessellations and polyhedra of various types.
The difference between the two categories lies in the type of paper to be used.
For tessellations, use light, single or two-coloured paper, while for polyhedra it is better 120 g heavy single-color stardream type paper.
I recommend ironing the finished tessellations with an iron and a damp cloth.

En este último libro he recopilado dibujos de teselaciones y poliedros de varios tipos.
La diferencia entre ambas categorías radica en el tipo de papel a utilizar.
Para teselaciones, utilice papel claro, de uno o dos colores, mientras que para poliedros es mejor Papel tipo stardream, monocromático y pesado, de 120 g.
Recomiendo planchar las teselaciones terminadas con una plancha y un paño húmedo.
